

We just received notice from EZEE FIBER that they are underway with their installation of fiber lines in Autumn Lake. Use the contact information attached if you have questions for them:

## HELLO NEIGHBOR!

# Ezee Fiber network construction is underway in your community.

## HERE'S WHAT TO EXPECT:

-  **1. Paint & Flags** — You will begin to see colored flags and chalk paint markings along our intended fiber path within the utility easement. These mark underground utilities such as gas, water and electric, **so please do not remove them.**
-  **2. Door Hangers** — We'll notify you with an Ezee Fiber door hanger a few days before construction is expected on or near your property.
-  **3. Our Crews** — Our crews will follow within 2-5 days. We use a minimally invasive boring method to install the fiber network. Thank you for your patience as construction can be messy.

## OUR COMMITMENT:

Minimizing disruptions is our goal, and we'll treat your property as if it were our own. If our work affects your landscaping, sprinkler system or invisible fence, we will make sure to remedy and restore it to its original condition 10-12 days after all construction is complete.

Questions? Contact us at 346.644.3788 or [support@ezeefiber.com](mailto:support@ezeefiber.com).
